BIBLIOTECA RENÉ GIRARD LAUNCHED IN SÃO PAULO

É Realizações Editora held an international colloquium 2-3 September, 2011 in São Paulo to celebrate the 50th anniversary of the publication of René Girard's first book and to launch a new series: the Biblioteca René Girard.

The Biblioteca René Girard includes thirty books to be published in 2011, most of them launched at the September colloquium, all by Girard and scholars of Girard. A selective but generous collection, the Biblioteca René Girard "is also an invitation for the reader to write his own books on mimetic theory," according to project coordinator João Cezar de Castro Rocha.

The two-day colloquium discussed the current state of mimetic theory and its future prospects, including special sessions on its relation to science, literature, theology, and epistemology.
